Pick up Stitch Diagram

The diagram shows the body suit with the right side facing.

Finishing

Use the long yarn tail to sew up the seam of the arms using mattress stitch. Remember to attach the top stitches around the arm hole.

Use the long yarn tails to sew together the leg seams using mattress stitch. Continue up the leg until you reach the section of 4 cast on stitches, and secure.

Attach the tail to the bottom of the body between the legs, just below the back opening.

Use the long yarn tails to sew together the two hood sides, continue down until you reach the point where you picked up the stitches for the hood sides.

Use the yarn tail to attach the spine spikes from the top of the hood right down the back and along the tail.

You will notice that there is a gap left at the back of the suit with a slight overlap section.

This gap will help make it easier to take the suit on and off. Use the section under the overlap to attach pop fastners or a little strip of Velcro to keep it closed.

If you are unsure of where to attach each piece use the photos below as guidance or if you need any help with the pattern please feel free to email me at jellybums@hotmail.com and i'll be happy help.
